Volume 160, July 1 to Dec. 15, 1984

The first figure is the issue number, which can be found on page 3. The second is the page number.

Production and propagation

Briggs Nursery: A tissue culture pioneer . . . 8:65
Cost of producing a rooted cutting 8:104
Developing a tree cultivar can take 20 years 8:83
Gene splicing: What can it do and how? . . . 8:44
Hot callusing pipe speeds up grafting . . . 8:113
How to build plastic greenhouses 8:119
How to control and schedule production . . 10:41
How to improve growth and yield in tissue culture 8:51
How to root and overwinter sugar maple cuttings 8:95
How to transplant Photinia in summer 7:55
Irrigation planning and equipment 4:61
Labor-saving material-handling systems . . 9:105
Lone Star plans to go native 3:40
Low flow rates may produce as much growth 10:59
Nursery production in the future 8:39
Park's seeds launched into space 8:77
Pitfalls in operating a tissue culture lab . . . 7:75
Pour-through method to determine nutrient availability 3:109
Tissue culture: Establishing plantlets in soil . 8:73
Trickle irrigation satisfies nursery 4:72
Weston Nurseries rhododendron breeding . . 8:89
What nurserymen should know about soluble salts 2:73

Landscaping

AAN landscape awards 3:61
Four landscapers discuss cooperation . . . 3:113
Landscaping trends and their applications . . 7:69
Natural landscape on a human scale . . . 1:128
Plants divide a villa garden into 10 rooms . . 9:86
Residential landscape design
A home, its landscape and the region . . . 7:71
Children are landscape clients, too 3:55
Shallow and expansive front yards 2:55
Small spaces can feel big 6:33
Visual access 12:57
Roots: Studies question common beliefs . . . 9:78
SLICE: A computer system for landscapers . 5:92
Tree transplanting and survival 9:83

Garden centers and retailing

British garden centers capitalize on leisure time 3:105
Brown Nursery registers wedding success . 11:113
Bygrave pioneers leisure center 11:54
Campbell's methods of displaying chemicals 11:119
Chalet sails to success 11:93
Computer pays off at Walters Gardens . . . 9:65
Effective displays are touchable 11:116
European retailers try new approaches . . 10:37
Fountain Square offers a touch of elegance 11:76
Garden centers in Europe lead in innovation 11:129
How do the displays look? 9:65
How to design a garden center — Program and site 11:30
How to design a garden center — Sales areas and traffic 11:42
How to treat fruit trees in the garden center . 6:69
Innovative marketing ideas for bulbs 5:71
One-stop stores compete for sales 7:37
Plants Unlimited provides personal service 11:70
Protect plant quality in the garden center . 11:135
Roger's Gardens and hanging baskets . . . 9:61
Schulz Nursery concert in the garden . . . 1:120
Springdale diversifies its business 11:96
Why we close our garden center for nine months 11:124

Management

1978-1984: The trade passes through an era 5:113
Choosing an accounting firm 5:137
Coaching new supervisors 5:49
Computer pays off at Walters Gardens . . . 9:65
Court cases and the nursery industry 5:37
Dealing with fears of computers 5:77
Fire! Rebuilding after disaster strikes 5:80
How to control and schedule production . . 10:41
How to make employees happy and be better workers 5:117
How to manage a large business 9:91
Identifying customer needs to close a sale . 5:143
Innovative marketing ideas for bulbs 5:71
Labor-saving material-handling systems . . 9:105
More benefits with fewer employees 2:79
Preserving the family business
Families can be assests 5:61
Heirs need to learn starting at birth 7:49
Heirs require concrete experience 9:57
Outside successors 12:65
Pros and cons of equity financing 10:69
Public relations and how it can help 10:63
SLICE: A computer system for landscapers . 5:92
Selecting good workers requires forethought 4:80
Sexual harassment on the job 4:31
Successful nursery management
Effective staff meetings 9:51
Exhibiting at trade shows 2:73
How to cut office expenses 5:126
Interviewing 12:77
Price as a marketing tool 4:43
Teach the way to better sales 7:41
Survey reveals trends in consumer demand . 5:64
Unpromoted workers need attention 10:82

Pest, disease and weed control

Disease-resistant rose search 10:51
Effective disease-control programs 4:66
How to control infestation during propagation 4:51
Monitoring and timing in insect control 4:76
Spray additive basics 4:34
Two postemergence grass killers 6:43

Plants and recommendations

Asian natives for American landscapes
Camellia Sasanqua and C. japonica 7:91
Corylopsis 10:31
Frank Meyer 3:96
Japanese yew 2:52
Kerria and Chimonanthus 12:70
Rosa rugosa and R. Wichuraiana 6:77
Diversifed line of trees can spark interest . . 6:81
Shrubs in the landscape
Ground covers 3:84
Plants that bear fruit 6:61
Pleasing plants for fall 7:60
Rapid-growing deciduous plants 12:82
Rapid-growing evergreens 9:42
Shrubs for shady sites 2:42
Texas native plants 1:114
Two native California oaks 6:53
Urban tree success is a matter of selection . 7:81
Vines add color, texture and dimension . . . 6:47

General topics

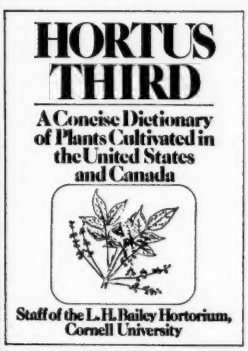
HORTUS THIRD



HORTUS
THIRD
A Concise Dictionary of Plants Cultivated in the United States and Canada
Staff of the L.H. Bailey Hortorium, Cornell University

The most comprehensive plant dictionary published in the United States during the past 35 years, **Hortus Third** accounts for the botanical names of 34,305 families, genera and species, plus a large but uncounted number of subspecies, varieties, formas and cultivars. It also includes the citation of the author or authors for each botanical name, diagnostic illustrations of representative species for most families, a glossary of botanical names and an index to common names. **Hortus Third** is the most important reference book available on plants cultivated in continental United States, Canada, Puerto Rico and Hawaii.

$125.00 Per Copy (Add $3.00 postage)—immediate shipment

1,304 Pages • 8 x 11 inches • 260 illustrations • 23,979 entries with description for families, genera and species • 10,326 cross-indexed synonyms • 10,408 common names • 1,105 glossary definitions of botanical terms • 187 general articles • Notes on use, culture & propagation • 3,293 authors of botanical names
